Contents

Adam, J. A., Noren, R.: Equilibrium model of a vascularized spherical carcinoma with central necrosis — Some properties of the solution 735
Ardito, A., Ricciardi, P., Schiaffino, A.: The effects of seasonal fluctuations on an open access fishery problem 879
Artzrouni, M.: A modeled time-varying density function for the incubation period of AIDS 73

Barbour, A. D., Kafetzaki, M.: A host-parasite model yielding heterogenous parasite loads 157
Behncke, H.: A mathematical model for the force and energetics in competitive running 853
Blanchard, P., Combe, P., Nencka, H., Rodriguez, R.: Stochastic dynamical aspects of neuronal activity 189
Boucher, W.: A deterministic analysis of self-incompatibility alleles 149
Braun, W. J., Kulperger, R. J.: Differential equations for moments of an interacting particle process on a lattice 199
Britton, N. F., Timm, U.: Effects of competition and shading in planktonic communities 655
Budd, C. J. → Vickers, G. T.

Cai, Z.-S. → Chicone, C. C.
Campbell, R. B.: Half-sib mating structures 241
Chaplain, M. A. J., Sleeman, B. D.: Modelling the growth of solid tumours and incorporating a method for their classification using nonlinear elasticity theory 431
Chauvet, G.: An n-level field theory of biological neural networks 771
Chauvet, G. A.: Non-locality in biological systems results from hierarchy. Application to the nervous system 475
Chen, P. → Sachs, R. K.
Chicone, C. C., Cai, Z.-S., King, P. D., Forker, E. L.: A parameter identification problem arising from a model of canalicular bile formation 273
Combe, P. → Blanchard, P.

Derrick, W. R., Driessche, P. van den: A disease transmission model in a nonconstant population 495
Dickinson, R. B., Tranquillo, R. T.: A stochastic model for adhesion-mediated cell random motility and haptotaxis 563
Driessche, P. van den → Derrick, W. R.

Erneux, T. → Holden, L.

Feldman, M. W. → Zhivotovsky, L. A.
Fogelson, A. L. → Moll, V. H.
Forker, E. L. → Chicone, C. C.
Freedman, H. I., Yuantong, X.: Models of competition in the chemostat with instantaneous and delayed nutrient recycling 513

Gavrilets, S.: Equilibria in an epistatic viability model under arbitrary strength of selection 397
Gradl, H., Walcher, S.: On continuous time models in genetic and Bernstein algebras 107
Griffiths, R. C. → Nath, H. B.

Hahnfeldt, P. → Sachs, R. K.
Hallam, T. G. → Silva, J. A. L.
Heesterbeek, J. A. P., Metz, J. A. J.: The saturating contact rate in marriage — and epidemic models 529
Hlatky, L. R. → Sachs, R. K.
Holden, L., Erneux, T.: Understanding bursting oscillations as periodic slow passages through bifurcation and limit points 351
Holgate, P.: The multilocus Hardy—Weinberg law 101
Hutson, V. C. L. → Vickers, G. T.

Ikeda, T., Mimura, M.: An interfacial approach to regional segregation of two competing species mediated by a predator 215

Kafetzaki, M. → Barbour, A. D.
Kalachev, L. V.: A relaxation wave solution of the FitzHugh—Nagumo equations 133
Kappel, F., Peer, R. O.: A mathematical model for fundamental regulation processes in the cardiovascular system 611
King, P. D. → Chicone, C. C.
Kulperger, R. J. → Braun, W. J.

Lai, D. → Sachs, R. K.
Lewis, M. A., Murray, J. D.: Analysis of dynamic and stationary pattern formation in the cell cortex 25
Lindström, T.: Qualitative analysis of a predator-prey system with limit cycles 541
Liu, W.-M.: Dose-dependent latent period and periodicity of infectious diseases 487
Lui, R., Selgrade, J. F.: Density-dependent selection migration model with non-monotone fitness functions 717

Metz, J. A. J. → Heesterbeek, J. A. P.
Mimura, M. → Ikeda, T.
Moll, V. H., Fogelson, A. L.: Activation waves in a model of platelet aggregation: existence of solutions and stability of travelling fronts 675
Murray, J. D. → Lewis, M. A.

Nath, H. B., Griffiths, R. C.: The coalescent in two colonies with symmetric migration 841
Nencka, H. → Blanchard, P.
Noren, R. → Adam, J. A.
Notohara, M.: The genealogical process of neutral genes with mutation in geographically structured populations 123
Notohara, M.: The strong-migration limit for the genealogical process in geographically structured populations 115

Peer, R. O. → Kappel, F.

Ricciardi, P. → Ardito, A.
Rodriguez, R. → Blanchard, P.
Ruan, S.: Persistence and coexistence in zooplankton-phytoplankton-nutrient models with instantaneous nutrient recycling 633

Sachs, R. K., Chen, P., Hahnfeldt, P., Lai, D., Hlatky, L. R.: DNA damage in non-proliferating cells subjected to ionizing irradiation at high or low dose rates 291
Schiaffino, A. → Ardito, A.
Selegrade, J. F. → Lui, R.
Sherratt, J. A.: Actin aggregation and embryonic epidermal wound healing 703
Silva, J. A. L., Hallam, T. G.: Effects of delay, truncations and density dependence in reproduction schedules on stability of nonlinear Leslie matrix models 367
Sleeman, B. D. → Chaplain, M. A. J.
Sulsky, D.: Numerical solution of structured population models. I. Age structure 817
Szucs, J. M.: Equilibria and dynamics of selection at a diallelic autosomal locus in the Nagylaki—Crow continuous model of a monoecious population 317
Szucs, J. M.: Equilibria and dynamics of selection at a diallelic autosomal locus in the Nagylaki—Crow continuous model of a monoecious population with random mating. II. The case of constant fertilities 601

Taib, Z.: A note on modelling the dynamics of budding yeast populations using branching processes 805
Tang, B., Wolkowicz, G. S. K.: Mathematical models of microbial growth and competition in the chemostat regulated by cell-bound extracellular enzymes 1
Teramoto, E.: Random disturbance and diversity of competitive systems 761
Timm, U. → Britton, N. F.
Tranquillo, R. T. → Dickinson, R. B.
Tuljapurkar, S.: Entropy and convergence in dynamics and demography 253

Vickers, G. T., Hutson, V. C. L., Budd, C. J.: Spatial patterns in population conflicts 411

Walcher, S. → Gradl, H.
Watson, R. → Yip, P.
Wolkowicz, G. S. K. → Tang, B.

Yip, P., Watson, R.: Estimating selective advantage of two alleles in discrete time 797
Yuantong, X. → Freedman, H. I.

Zhivotovsky, L. A., Feldman, M. W.: Heterogeneous selection in subdivided populations 747
Zhivotovsky, L. A., Feldman, M. W.: On the probability of loss of new mutations in the presence of linkage disequilibrium 177
